2 YEAR WARRANTY

Akdaş shotguns are manufactured to the highest possible standards, using the finest materials, to give a lifetime of service. In the unlikely event of there being a defect in material or workmanship, at anytime within three years of purchase, Akdaş undertakes to repair or replace the shotgun (at Akdaş's discretion). Warranty is only valid for the original purchaser of the shotgun and cannot be transferred to subsequent owners. Warranty must be registered to be valid.

Register your warranty, view all conditions and see all Akdaş

Products at: www.akdassilah.com

Warranty applies to Turkish residents only. If you are not a Turkish resident and the the gun was purchased outside the Turkey please refer to your retailer or distributor.

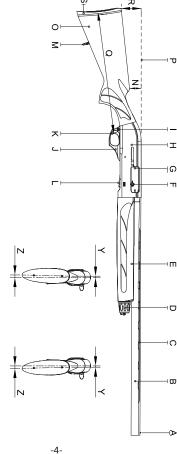

STORING YOUR SHOTGUN IN A CARRYING CASE IS NOT ADVISABLE. RUST MAY OCCUR DUE TO TRAPPED MOISTURE IN THE CASE.

1-SAFETY RULES

WARNING: THE FAILURE TO FOLLOW THESE SHOTGUN SAFETY REQUIRE-MENTS WILL CAUSE SERIOUS PERSONAL INJURY OR DEATH TO YOU OR OTHERS.

- ALWAYS TREAT A FIREARM AS IF IT WERE LOADED. NEVER ASSUME THAT IT IS UNLOADED.
- NEVER POINT THE FIREARMS AT SOMETHING THAT IS NOT SAFE TO SHOOT.
- ALWAYS STORE FIREARMS TO PREVENT CHILDREN FROM HAVING ACCESS TO THEM. IT IS YOUR RESPONSIBILITY TO INSURE THAT UNAUTHORIZED PERSONS DO NOT GAIN ACCESS TO YOUR FIREARM. TO REDUCE THE RISK OF ACCIDENTS INVOLVING CHILDREN, UNLOAD YOUR FIREARM, LOCK IT AND STORE THE AMMUNITION IN A SEPARATE LOCKED LOCATION.
- ALWAYS WEAR ADEQUATE AND PROPER EAR PROTECTORS.
- ALWAYS WEAR SAFETY PROTECTIVE GLASSES SPECIFIED FOR FIREARM USE.
- ALWAYS BE ALERT AND ALWAYS FOLLOW THE SAFETY INSTRUCTIONS
 OF THE RANGE OFFICER. NEVER SHOOT IF YOU ARE TIRED, COLD OR
 IMPAIRED IN ANY WAY.
- ALWAYS BE AWARE OF YOUR SORROUNDINGS, AND BE ALERT THAT
 PEOPLE CAN WALK INTO YOUR LINE OF FIRE.
- THE SHOOTER (AND ALL OTHERS IN THE SHOOTING AREA) MUST AL-WAYS BE IN A POSITION THAT IS OUT OF THE LINE OF FIRE.
- NEVER SHOOT AT HARD SURFACES, WATER OR RANDOMLY INTO THE SKY. ALWAYS SELECT A PLACE TO SHOOT THAT HAS A SAFE BACKSTOP AND IS FREE FROM OBSTRUCTIONS AND WATER SURFACES WHICH CAUSE RICOCHETS.
- NEVER CLIMB A TREE, FENCE OR OBSTRUCTION WITH A LOADED FIREARM. OPEN AND EMPTY THE CHAMBER OF YOUR FIREARM AND ENGAGE THE MANUAL SAFETY BEFORE CLIMBING OR DESCENDING A TREE OR BEFORE CLIMBING A FENCE OR JUMPING OVER A DITCH OR OBSTRUCTION.
- NEVER TRANSPORT A LOADED FIREARM.
- NEVER USE ALCOHOL OR DRUGS BEFORE OR WHILE SHOOTING OR HANDLING ANY FIREARM.

H Receiver

Q Lenght of Pull R Drop at Heel

Y Top Advance Angle S Butt Plate / Recoil Pad

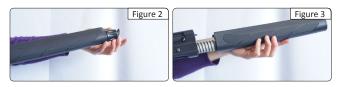

Z Bottom Advance Angle

3-INITIAL ASSEMBLY AND INSPECTING

• Your shotgun is shipped from the factory with the barrel not assembled to the receiver (Figure 1).

• Unscrew the fore-end retaining nut (Figure 2) and remove the fore-end by pulling it forward (Figure 3).

Next, assemble the barrel to the receiver(Figure 4). When doing this you
might need to pull/release the cocking handle for easier fitting. Assemble
the fore-end (Figure 5) and then screw the fore-end retaining nut (Figure
6).

4-SAFETY BUTTON

The safety is designed to stop the trigger operating.

The safety on any gun is a mechanical device, and it is not intended as a substitute for common sense or safe gun handling. Always keep the muzzle pointed in a safe direction.

- The safety is located behind the trigger, and provides protection against accidental or unintentional discharge under normal usage when properly engaged.
- To engage the safety, push the button so that it protrudes from the right side of the gun and the RED RING CAN NOT BE SEEN (Figure7). The safe should always be in the "on" or "safe" position until you intend to fire the gun.
- When you are ready to fire the gun, press the safety button to the "off" or "fire" position, so that the safety protrudes from the left side of the shotgun and the RED RING APPEARS (Figure 8).

WARNING: The gun will fire when the trigger is pulled intentionally or accidentally when the RED RING APPEARS.

5-LOADING AND USAGE

WARNING: WHILE LOADING, KEEP THE SAFETY "ON" AT ALL TIMES AND KEEP THE MUZZLE AIMING AT A SAFE DIRECTION.

To load your semi-automatic shotgun, pull the cocking handle backward till it is locked (Figure 9) and press the bolt release button (Figure 10). Looking at the bottom of the gun, you will see that it is possible to move the carrier into the receiver. You can now insert shells in the magazine tube using your thumb (Figure 11). Note that your gun is factory limited to 3 shells - 2 in the magazine and 1 in the chamber - using a magazine plug. To chamber a shell, push the shell drop lever located at the back of the carrier (Figure 12), and pull the cocking handle backward and a shell will transfer from the magazine tube into the chamber (Figure 13). When you pull and release the cocking handle, the first round will get chambered and you are ready to fire. As the first shell is chambered, you can add one more shell into the magazine tube.

WARNING: To prevent unexpected ignition and potential injuries, be certain that each round you use is in the proper gauge!

Always keep your fingers away from the trigger while loading your gun!

6-UNLOADING

WARNING: WHILE UNLOADING, KEEP THE SAFETY "ON" AT ALL TIMES AND KEEP THE MUZZLE AIMING AT A SAFE DIRECTION.

Push the bolt release button and the carrier simultaneously. You will see that the shells will be ejected from the magazine tube (Figure 14). When all the shells are ejected, check the chamber by pulling the cocking handle backwards so that any shell in the chamber will be ejected (Figure 15).

Always keep your fingers away from the trigger while loading/unloading your gun!

7-DISASSEMBLY

 Unscrew the fore-end retaining nut (Figure 16), and remove the fore-end (Figure 17). Take the barrel off by pulling it forward (Figure 18).

 Grasping the action bar in the hand and pulling the recoil spring slowly backwards, remove the cocking handle (Figure 19). For taking the cocking handle out or inserting it into its slot, the lateral side surface of the cocking handle must center the hole on located on the bolt (Figure 20). This can be achived by pushing the bolt with your thumb.

7-DISASSEMBLY

 Next, remove the bolt (Figure 21), action bar (Figure 22), and the recoil spring (Figure 23). Take the gas piston located in the gas chamber out that is under the barrel by pulling it with your fingernails (Figure 24).

 Using a tool like a pin (if necessary, with the support of a hammer) remove the pin (Figure 25) and take the trigger group housing out (Figure 26).

8-REASSEMBLY

 Firstly, place the trigger group housing (27), and insert the trigger group housing pin (28). Before putting the trigger group housing into its place, make sure that the hammer is cocked. Figure 29 shows the cocked state, and Figure 30 shows the decocked state of the hammer.

 Afterwards, mount the recoil spring and insert the action bar and bolt group to the receiver (Figure 31), and insert the cocking handle into its slot (Figure 32). For taking the cocking handle out or inserting in into its slot, the lateral side surface of the cocking handle must center the hole on located on the bolt.

8- REASSEMBLY

 Now, insert the gas piston into the gas chamber located under the barrel (Figure 33), and attach the barrel to the receiver (Figure 34), assemble the forend (Figure 35), and finally screw the forend retaining nut (Figure 36).

9-ADJUSTABLE STOCK

 Each shotgun is provided with a set of stock shims to assist the shooter in obtaining a personalized fit to the sighting plane. The stock is user adjustable for either cast or stock drop. This adjustment is made by replacing the plastic shim located between the receiver and the stock (Figure 37). Note that only one shim can be inserted between stock & receiver.

- The factory installed shim is marked CIP which provides a neutral cast and standard drop dimensions of the comb. The shim kit includes two replacement shims that change the cast of the stock, either Left 5 or Right 5. These spacers do not affect the stock drop.
- The kit includes three replacement shims that change the drop of the stock. The slope of the drop in the stock can be changed from standard to -10, or -5 or a positive 5 direction.
- Replacing the stock shim requires the removal of the butt pad. The butt pad is attached by two Philips head screws. To detach the pad;
- Locate the screws on the pad (Figure 38).
- Lubricate the shaft of the screw driver to prevent damaging the rubber pad (Figure 39).

9-ADJUSTABLE STOCK

Once the pad is removed, loosen and remove the stock bolt and its
washer using a wrench (Figure 40), and pull the stock free from the
receiver (Figure 41). Note that it is not necessary to remove both of the
screws on the pad; you may unscrew one of them and pivot the pad to
gain access to the bolt.

- Remove and replace the shim for a personalized stock fit (Figure 42), and re-attach the stock and tighten the stock bolt (Figure 43).
- Re-attach the butt pad with lubricated screw driver (Figure 44).

10-USE OF CHOKE TUBES

With the choke tubes you can controls the openness or tightness of the pattern of your shotgun. The chart below lists the chokes available (from open to tight), and the corresponding marks that indicate the choke of your shotgun.

CHOKE	TRUE CYLINDER	1/4	1/2	3/4	FULL
AMERICAN DESIGNATION	CL (Cylinder)	IC (Improved Cylinder)	M (Modified)	IM (Improved Modified)	F (Full)
СНОКЕ ТИВЕ	\bigcirc		\bigcirc	\bigcirc	\bigcirc
NOTCHES	****	****	***	**	*
COMPATIBILITY WITH STEEL SHOT	Recommended	Recommended	Recommended	Do Not Use	Do Not Use
BEST IN THE AREA OF	Sporting, clay and skeet shooting. Short distance, more open shooting.	Quail, dove and target shooting. For shorter distance more open shooting.	Hunting woodcock, pheasant & quail with 30- 35 yard shots. Long range hunting with steel shot and tight groups.	For hunting pheasant, ducks with 30-40 yard shots.	For duck and goose hunting with 40-45 yard shots. For long range hunting with lead shot and tight groups.

All the five choke tubes are included in the package in a specially designed box (Figure 45).

WARNING: When installing a choke tube in your barrel, make sure that the tube is completely screwed down tight in the barrel, never shoot your shotgun without the choke tubes installed as this may damage the barrel and injure the shooter. Choke tubes may become loose after extended firing and should be checked frequently of tightness.

10-USE OF CHOKE TUBES

INSTALLATION OF CHOKE TUBES

WARNING: Check that the firearm is unloaded. If not, unload the firearm by operating as described in the chapter "Unloading". Never look into the muzzle or change tube on a loaded gun; even with safety is set to "on".

- Apply a thin coat of gun oil to the threads of the barrel and of the choke tube.
- Insert the desired chokes into the choke housing. Take care the notched end will be upside.
- Carefully hand screw the chokes into the barrels clockwise (Figure 46).
 Using the choke tube Wrench; tighten the choke until it is fully bottomed into its recess in the barrel.
- · Remove the choke tube wrench after tightening.

10-USE OF CHOKE TUBES

REMOVAL OF CHOKE TUBES

WARNING: Check that the firearm is unloaded. If not, unload the firearm by operating as described in the chapter "Unloading". Never look into the muzzle or change tube on a loaded gun, even with safety engaged.

• Unscrew (counterclockwise) the choke tube using the choke tube wrench supplied (Figure 47). Remove the choke tube from the muzzle (Figure 48).

CLEANING OF CHOKE TUBES

WARNING: Check that the firearm is unloaded. If not, unload the firearm by operating as described in the chapter "Unloading". Never look into the muzzle or change tube on a loaded gun, even with safety set to "on".

- Carefully clean the choke housing. If necessary, use a cotton patch coated with gun oil.
- Check the choke to make sure it is perfectly clean inside and outside.
- Apply a thin coat of gun oil to the threads of the barrel and of the choke tube.

13-CLEANING AND MAINTENANCE

WARNING: ENSURE THAT YOUR FIREARM IS UNLOADED BEFORE BEGINNING TO CLEAN IT.

At the end of the day of shooting/hunting, clean and lubricate the shotgun. **Cleaning procedure:**

- Disassemble the shotgun (see paragraph "Disassembly").
- Clean the bores with care by passing a cleaning rod with a cotton patch coated with a high-quality gun oil to remove combustion residues. Also include the chamber in your cleaning operation.
- Do not forget to clean chokes and choke seats by removing the chokes; otherwise the chokes will be really difficult to remove, if they are not cleaned for a long time.
- Run a clean dry patch through the bores to remove oil residues.
- Lightly oil the inside of the barrels with a clean cotton patch coated in high-quality gun oil.
- Clean with care the external surfaces of the shotgun to remove any trace of dirt, sweat and fingerprints.
- Grasp your shotgun on the wooden/synthetic parts and place it into its case
 or wherever you would like to keep it. Make sure you do not touch the metal
 parts while you are putting your shotgun back into its place.

Always follow the instructions provided with your gun cleaner and gun lubricant.

Whenever your firearm has been exposed to sand, dust, extreme humidity water or other adverse conditions, it must be cleaned and lubricated.

After intensive use period, check the BOLT and if necessary, clean and lubricate it using suitable gun oil.

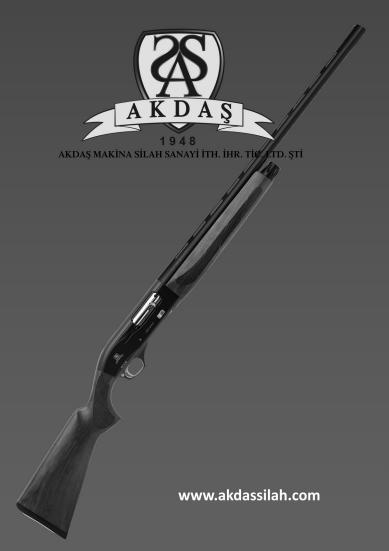

If your firearm is used in a cold climate, be sure to use an oil of an appropriate weight so that it will not congeal in cold temperatures.

NEVER MANIPULATE, ADJUST OR CHANGE ANY OF THE INTERNAL COMPONENTS OF YOUR FIREARM.

ANY MAINTENANCE, ADJUSTMENT OR SERVICE NOT SPECIFIED IN THIS MANUAL MAY AFFECT THE SAFETY AND RELIABILITY OF YOUR FIREARM AND MUST BE PERFORMED BY AN AUTHORIZED GUN-SMITH USING GENUINE FACTORY PARTS. IF YOU DO OTHERWISE, IMPROPER FUNCTIONING OF YOUR FIREARM MAY OCCUR AND SERIOUS INJURY OR DEATH MAY RESULT.

When storing, do not encase the shotgun in anything that will attract or hold moisture, for example; leather or heavy cloth. Also, do not store shotguns with a plug inserted in the barrel for this can be a contributing factor to moisture accumulation. If the shotgun is to be stored for an extended period, the bore, chamber and internal surfaces should be oiled with a high-quality lubricating oil preservative intended for firearms.

The external parts; receiver, bolt and barrel should be coated with an antirust oil.

GAS OPERATED SEMI-AUTOMATIC MODELS

READ THE INSTRUCTIONS AND WARNINGS IN THIS MANUAL BEFORE USING THIS SHOTGUN!
