export to more than 30 countries**

## HISTORY

Ömer Akdaş from Huğlu is the founder of Akdaş who started working in gun-making business in 1948 with a few of the best Turkish gunsmiths of the time. After a while, he designed his first single barrel shotgun and in the following years began to run his own gun workshop. Thereafter, he became well-known for his skills making him the gun-maker beloved by many hunters. Ömer Akdaş was the one ever to manufacture the very first side-by-side shotgun in Turkey.

Sadık Akdaş, his son, joined his father in 1975. Having learned any nuance of guns from his father, he has been repairing and maintaining all kinds of domestic and foreign made guns since the age of 13. He is the first Turkish gunsmith ever to produce an inertia operated semi-automatic shotgun with the help his father in 1988. In 2004, he designed and produced the first and unique English style side-lock over-and-under and side-by-side shotguns, which have been made in Turkey so far. Throughout his career, he has been regarded by hunters/shooters and is the only Turkish gunsmith to service high-end shotguns from all over the world.

Selim Akdaş joined his brother Sadık in 1987 and the conversion from old-school workshop to modern factory started. In addition to shotguns, various parts for different industries were started to be manufactured.

So far, Akdaş Arms has worked with some of world-famous shotgun manufacturing companies and proven its quality over and over.

Awarded as the result of excessive effort, Akdas has been a successful new player in defense industry starting in 2018 by designing a unique 40 mm under-barrel grenade launcher that could pass all the military grade tests. Akdas Grenade launcher is proudly supplied to Turkish Armed Forces. Later on, new products like 9x19 mm sub-machine gun etc. were added to the product range.

In 2021, Akdas has decided to specialize in deeper in both shotgun and defense sectors adopting the group company structure.

Akdaş Outdoor is combining the tradition and modern technology where it provides hunters/shooters a quality made in Turkey shotgun with an affordable price tag.

Akdas Silah is working hard to design and manufacture various defense products requested by the Ministry of Defense and all international customers, where Akdas Silah is already good at.

With an experience over half a century, there is no doubt that Akdaş Companies handle all these properly.
